# 🔒 Audio session state (make audio persist through multipage)

● Using Streamlit

session-state

maciekg

Feb 2023

Is there a way to make audio persist (i.e. continue playing) when navigating around a multipage app?

It currently stops playing once another page is clicked on.

something like this?

```
st.session_state['audio'] = st.audio("audio/audio.mp3")
st.session_state['audio']
```

Hi @maciekg ,

There isn't a built-in audio session state feature. Hypothetically, you could save the current timestamp to session state when the user changes pages and then resume the audio at that same timestamp. I'm not sure how well this would work but it could be worth a shot.

Hi @Caroline , How could I get the current timestamp of the audio widget?
